Backpack Dispenser Harness Instructions

Step One

Clip together the waist harness. Make sure that all straps are straight and that the belt is comfortable. If using the hand pump wrap the hand pump strap around the waist harness before it's clipped together.

Step Two

After clipping together the waist harness, pull tight. This should be done when the backpack is first put on and then again after all other straps have been tightened.

Step Three

Clip together the chest belt. This is very important for overall comfort. It keeps the shoulder straps from pulling to the outside.

Step Four

After clipping together the chest belt, pull tight. This helps keep the two (2) shoulder straps pulled together, making it more comfortable for the user.

Step Five

Tighten the shoulder straps. This will pull the backpack closer to the user. The tighter the backpack is to the user the more comfortable it is. Pull all straps as tight as possible. This also raises the backpack up on the users back making it more comfortable.

Step Six

Make sure that both shoulder straps are tight. This is very important because it pulls the backpack tight against your body.

Step Seven

Clip on the money pouch. Make sure that you tighten both sides. The basic pouch is shown.
